

## Coronas de sierra con plaquitas de carburo de tungsteno

- Las coronas de sierra con plaquitas de carburo de tungsteno pueden perforar ladrillo, cerámica, laminados, fibra de vidrio y madera dura al igual que acero
- Se adaptan a todas las taladradoras eléctricas, tanto fijas como portátiles
- Los agujeros permiten la fácil expulsión del material cortado
- Máxima profundidad de corte 38 mm (1 1/2")
- 4 dientes por pulgada
- Diámetro máximo a perforar = tamaño nominal de la corona de sierra + 1,5 mm / - 0,0.
